## Strictly Confidential: (For Internal and Restricted use only) Senior School Certificate Examination - 2020

## Marking Scheme – ECONOMICS SUBJECT CODE:030 PAPER CODE –58/1/2

## General Instructions: -

- 1. You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully. **Evaluation is a 10-12 days mission for all of us. Hence, it is necessary that you put in your best efforts in this process.**
- 2. Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one's own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and marks be awarded to them.
- 3. The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
- 4. Evaluators will mark(  $\sqrt{}$  ) wherever answer is correct. For wrong answer 'X"be marked. Evaluators will not put right kind of mark while evaluating which gives an impression that answer is correct and no marks are awarded. This is most common mistake which evaluators are committing.
- 5. If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totaled up and written in the left-hand margin and encircled. This may be followed strictly.
- 6. If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.
- 7. If a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out.
- 8. No marks to be deducted for the cumulative effect of an error. It should be penalized only once.
- 9. A full scale of marks 0-80 has to be used. Please do not hesitate to award full marks if the answer deserves it.
- 10. Every examiner has to necessarily do evaluation work for full working hours i.e. 8 hours every day and evaluate 20 answer books per day in main subjects and 25 answer books per day in other subjects (Details are given in Spot Guidelines).
- 11. Ensure that you do not make the following common types of errors committed by the Examiner in the past:-

- Leaving answer or part thereof unassessed in an answer book.
- Giving more marks for an answer than assigned to it.
- Wrong totaling of marks awarded on a reply.
- Wrong transfer of marks from the inside pages of the answer book to the title page.
- Wrong question wise totaling on the title page.
- Wrong totaling of marks of the two columns on the title page.
- Wrong grand total.
- Marks in words and figures not tallying.
- Wrong transfer of marks from the answer book to online award list.
- Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.)
- Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
- 12. While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0)Marks.
- 13. Any unassessed portion, non-carrying over of marks to the title page, or totaling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
- 14. The Examiners should acquaint themselves with the guidelines given in the Guidelines for spot Evaluation before starting the actual evaluation.
- 15. Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totalled and written in figures and words.

The Board permits candidates to obtain photocopy of the Answer Book on request in an RTI application and also separately as a part of the re-evaluation process on payment of the processing charges.

Q. NO.	SECTION- A (MACRO ECONOMICS)	Marks
NO.	EXPECTED ANSWER	IVICINS
1	Question: Two component of money supply are and	
	(Fill in the blanks with the correct answers)	
	Answer: (i) Currency held with public	1/2
	(ii) Demand deposits of commercial banks.	1/2
2	Question: Primary Deficit can be estimated using the formula	
	(Fill in the blank with the correct formula) <b>Answer:</b> Fiscal deficit – interest payments	1
3	<b>Question:</b> is one of the most important sources of demand for foreign currency.	_
	(Fill in the blank with the correct answer)	
	Answer: Import of goods and services (or any other correct answer to be allotted marks)	1
4	Question: State the meaning of: "Trade deficit"	
	Answer: Trade deficit refers to the excess of the payments for imports of visible items over	
	the value of receipts of exports of visible items.	1
5	Question: State whether the following statement is true or false:	
	"Government Budget is an important monetary policy instrument."	
	Answer- False	1
	OR	
	Disinvestment is a (capital/revenue) receipt of the government. (Choose the correct alternative)	
	Answer: capital	1
6	Question: In order to control the money supply in the economy, the Central Bank may	
	(Choose the correct alternative)	
	(A) Buy securities in the open market (C) Reduce cash reserve ratio	
	(B) Sell securities in the open market (D) Reduce repo rate	
	Answer: One mark to be allotted for any given option (A), (B), (C) or (D).	1
<b>7</b>	Question: Effective demand is defined as (Fill in the blank with the suitable definition)	
	Answer: that level of output and employment where Aggregate Demand is equal to	
	Aggregate supply.	1
8	<b>Question:</b> State whether the following statement is true or false:	
	"Expected obsolescence is included in depreciation."	
	Answer: True	1
9	<b>Question:</b> According to the theory of Keynesian Economics, the value of average propensity	
	to consume can never be (Choose the correct alternative)	
	(A) Zero (B) Unity (C) More than one (D) Less than one	
	Answer: (A) Zero	1
10	Question: State whether the following statement is true or false:	
	"As per Keynesian theory in an economy, full employment can never exist."	
	Answer: False	1

11	Question: "Ex- ante Savings and Ex-ante Investments are always equal." Defend or refute the given statements with valid reasons.Answer: The statement is false. Ex-ante savings are equal to ex-ante investments only when the economy is in equilibrium. At under-employment equilibrium level, when ex-ante investments fall short of ex-ante savings, it will lead to accumulation of unplanned inventories. Hence the producer will reduce employment leading to reduction in output and income till the two forces becomes equal to each other and vice versa. (to be marked as a whole)(Diagram not required)	3
12	Question: "Final goods include only those goods which are consumed by the households".         Defend or refute the given statement with valid reason.         Answer: The given statement is refuted as final goods include those goods which are either consumed by the households or purchased by a producer for investment purposes.         (No marks are to be allotted if reason is not/wrongly given)         OR         Question: "Circular flow principle is based on the assumption that one's expenditure will	3
	become other's income." Explain the given statement.	
	Answer- In a two sector economy households and firms exist to run the economy. Households render factor services to the firms and earn factor incomes from them. Whereas; firms produce and sell goods and services to households and earn their income by an equal magnitude. Thus, in a circular income mode, the axiom that one's expenditure is other's income holds true. (to be marked as a whole) (Diagram not mandatory)	3
13	Question: a. Distinguish between Tax Revenue and Non- Tax Revenue. Answer: Tax Revenue consist of the sum total of receipts from taxes and other duties levied by the government. For example revenue of the government from Income tax, Goods and Services Tax etc.	1 ½
	Non-Tax Revenue is the receipts of the government from all sources other than the taxes. For example dividends and profits on investments made by the government.	1 ½
	Question: b. State any one example of Capital Expenditure. Answer: Construction of roads by government or repayment of the loan by the government. (any other relevant example)	1
14	<b>Question:</b> Using a hypothetical numerical example, explain the process of credit creation by a commercial bank.	
	<b>Answer:</b> Credit multiplier measures the amount of money that the banks are able to create in the form of deposits with every initial deposit. The credit creation is inversely related to LRR. Higher the credit multiplier, higher will be the total credit created and vice - versa.	1
	The credit creation by commercial banks is determined by : 1. The amount of the initial deposit.	
	<ol> <li>The Legal Reserve Ratio (LRR).</li> <li>Suppose the initial deposits are ₹ 1000 and LRR is 10%, the banks will keep 10% of the deposits i.e. ₹ 100 as reserves and will lend the remaining amount of ₹ 900. Those who borrow will spend the money for making payments.</li> </ol>	½ ½

· · · · ·		
	It is assumed that the entire ₹ 900 comes back as secondary deposits to the banking system. Now the banks will again keep 10% of ₹900 i.e. ₹ 90 as reserve and lend out ₹ 810. This process continues till total reserves become equal to initial reserves.	2
	Total money creation = Initial deposit $\left(\frac{1}{LRR}\right) = 1000(\frac{1}{10\%}) = ₹ 10,000$	
	Hence, the initial deposit of $\gtrless$ 1000 has led to the total money supply of $\gtrless$ 10,000.	
	(Explanation in tabular form should also be allotted marks)	
	OR	
	<b>Question:</b> "Central bank acts as the banker to the government". Elaborate the given statement. <b>Answer:</b> The central bank acts as the banker to the Government, maintain accounts of government for the purpose of accepting deposits and advancing loans. The central bank purchases and sells government securities in the open market on behalf of the government. It may also advise the government on policy matters, if solicited. <b>(to be marked as a whole)</b>	4
15	<b>Question:</b> "India is taking huge leaps in the index of Ease of doing Business; as a result many MNCs are shifting their production base to India." In the light of the above statement, comment upon the flow of foreign exchange and its likely impact on the Indian Economy. <b>Answer:</b> India, with greater ease of doing business, may attract many more MNC's to shift their production base to India, thereby increasing the inflow of foreign exchange (say \$) to	
	the Indian economy. This increase in foreign direct investments (FDI) by MNCs will lead to increase in the supply of foreign exchange in India leading to a fall in the rate of foreign exchange, i.e. Indian Rupee (₹) may appreciate. Increase in FDI will result in increase in production and hence may also generate employment opportunities in the Indian economy. (to be marked as a whole)	4
	<ul> <li>Consumption curve.</li> <li>Answer: Steps of deriving Saving curve from Consumption curve: <ol> <li>Draw a 45° line from the origin in the upper part of the diagram. Determine the breakeven point B where the given consumption curve intersects the 45° line. Draw perpendicular from the breakeven point intersecting the X-axis at point B'.</li> <li>Take OS' equal to OC which is the starting point of the saving curve which represents dissavings.</li> <li>Join points S' B' and extend it by a straight line to get the saving curve S' S.</li> </ol> </li> </ul>	
	B Output -	3+3
	For Visually Impaired Candidates: Question: a. If the Saving function is $S = (-) 10 + 0.2 Y$ , how can Consumption function be	
1	derived from the given saving function?	

	Answer: As we know	M X - C + S		1
	$\therefore$ C = Y			1/2
		- 3 - (-10 + 0.2 Y)		1
	C = 10	· · · · ·		1/2

	SECTION- B INDIAN ECONOMIC DEVELOPMENT	
18	Question: First Industrial Policy Resolution of Independent India was announced in the year	
	(Fill in the blank with the correct alternative)	
	<b>(A)</b> 1947 (B) 1948 (C) 1951 (D) 1956	
	<b>Answer:</b> (B) 1948	1
19	Question: State any one outcome of implementation of Economic Reforms in India in 1991	
	Answer: Greater inflow of investment. (or any other relevant outcome to be allotted marks)	1
20	<b>Question:</b> State whether the statement is true or false.	
	"Self- Help Groups (SHGs) are an example of a microcredit organisation."	
	Answer: True	1
21	Question: was the predecessor organisation to World Trade Organisation.	
	(Choose the correct alternative)	
	(A) International Bank for Reconstruction and Development(IBRD)	
	(B) International Monetary Fund(IMD)	
	(C) Reserve Bank of India(RBI)	
	(D)General Agreement on Tariffs and Trade(GATT)	4
	Answer- (D) General Agreement on Tariffs and Trade(GATT)	1
22	Question: State the meaning of 'White Revolution.'	
	Answer: It is a system whereby all the farmers can pool their milk produced according to	-
	different grading (based on quality) and the same is processed and marketed to urban	1
	centres through cooperatives. (Any given answer to be marked correct and allotted marks.)	
23	Question: During India's first seven five- year plans, the Government of India adopted	
	policy to protect domestic industries. (Fill in the blank with the correct answer)	
		1
0.4	Answer: Import Substitution (or any other relevant term)	
24	<b>Question:</b> India is not a member of which of the following regional/global economic	
	grouping? (Choose the correct alternative)	
	(A) European Union (C) G-20 (B) BRICS (D) SAARC	
	Answer – (A) European Union OR	1
	Pakistan introduced its economic reforms in the year	-
	(A) 1974 (C) 1978	
	(B) 1976 (D) 1988	
	Answer – (D) 1988	1
25	Question: The main aim of 'Great Leap Forward' was to ensure rapid increase in	
_0	(primary/secondary/tertiary) sector in China. (Choose the correct alternative)	
		1
	Answer: secondary	
26	<b>Question:</b> State whether the statement is true or false.	
	"In the past few decades, primary sector has created maximum jobs in India"	
	Answer: False	1

	OR	
	Critically evaluate the role of rural banking system in the process of rural development in India.	
	<b>Answer-</b> Rapid expansion of the banking system had positive effect on rural farm and non farm output, income and employment. In spite of it, following problems have been faced in the rural banking such as-	
	The volume of rural credit in the country is still insufficient in comparison to its demand and institutional sources have failed to cover the entire rural farmers of the country.	
	<ul> <li>Less attention has been given on the credit requirements of needy (small and marginal farmers) and the problem of overdue in agricultural credit continues.</li> <li>(any other valid argument to be allotted marks)</li> </ul>	3
30	<b>Question:</b> (a) State any one positive contribution made by the British in India.	
00	Answer: (a) Introduction of Railways. (or any other valid positive contribution).	
	<b>Question:</b> (b) What was the two fold motive behind the systematic deindustrialisation effected by the British in pre-independent era?	1
	Answer: The two fold motive behind the systematic de-industrialisation effected by the British were:	$1\frac{1}{2}$
	i. to reduce India to a status of a mere exporter of important raw materials for the upcoming industries in Britain.	$1\frac{1}{2}$
	ii. to turn India into a sprawling market for the finished products of those industries so that their continued expansion could be ensured to the maximum advantage to their home country, i.e. Britain.	
	(any other valid argument to be allotted marks)	
31	Question: Define any two of the following:	
01	(a) Absorptive capacity of environment	
	(b) Carrying capacity of environment	
	(C) Poverty Line (in terms of calorific value).	
	Answers- (Any two of the following)	
	(a) Absorptive capacity of the environment- It means the ability of the environment to absorb degradation without causing environmental damage.	
	(b) Carrying capacity of environment – It implies that the resources extraction is not above the rate of regeneration of the resources and wastes generated are within the assimilating capacity of the environment.	
	(c) Poverty Line is the cut off point which divides the population of the country as poor and the non-poor. It can be determined in terms of calorie intake and monthly per capita expenditure (MPCE). According to this a minimum intake of 2400 caloriesper person per day in rural areas and 2100 calories person per day in urban areas is needed. (any other relevant definitions should be allotted marks)	2+2
